Clinical Visits by Department

DATA LIMITATION NOTES

1. Many diagnosis records do not match a clinical transaction by appointment ID. Treat the severity chart as a summary of the diagnosis table.
2. Clinical transactions workbook contains six sheets; appointments, diagnoses, laboratory tests, prescriptions, admissions and referral.

DATA LIMITATION NOTES

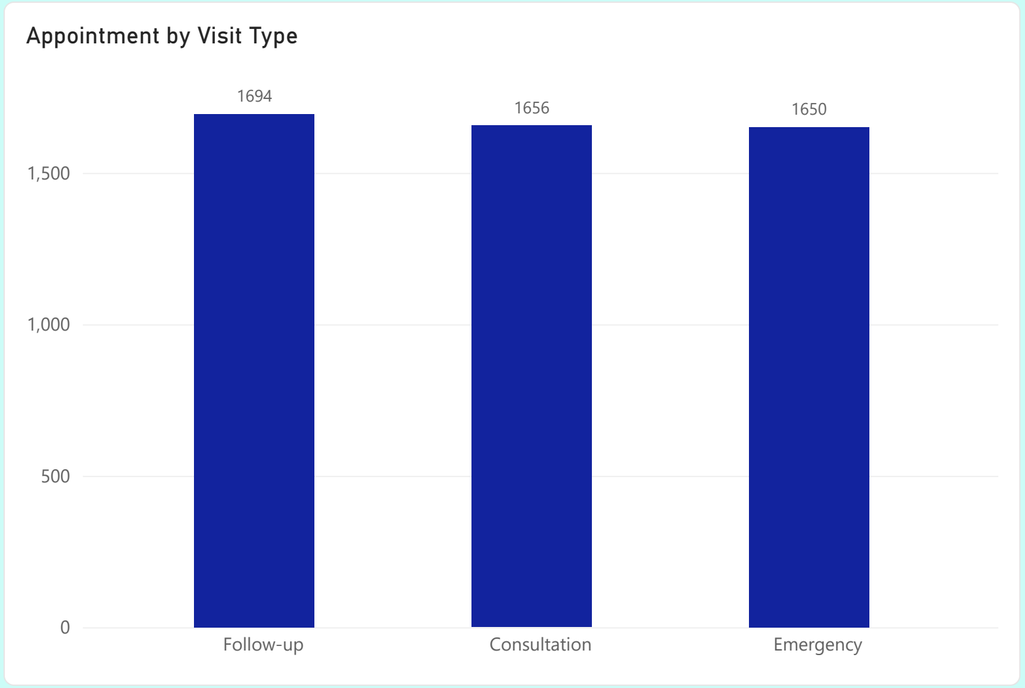

1. Based on 21,064 feedbacks, appointment-level matching is limited, and date-based filtering is not supported.
2. Reliable hospital ranking is limited by incomplete feedback-to-appointment matching.
3. Reliable department level ranking is limited by incomplete feedback-to-appointment matching. No statistically significant difference.
4. The rankings use the linked 1,756 responses, which are about 8% of all feedback.
